WHY SPONSOR

SPONSORS WILL BENEFIT FROM THE FANTASTIC OPPORTUNITY TO:

BUILD NEW AND EXISTING RELATIONSHIPS

- Network with current and future buyers
- Educate your audience with expert conversations
- Collect quality leads for your sales teams

INCREASE BRAND RECOGNITION

Your logo will appear on pre and post event marketing, including a presence on the event website, email campaigns, magazine adverts and post event video, as well as promotion via social media.

REACH THE DECISION MAKERS

The Summit is designed for an audience of key industry personnel focused on implementing digital construction in the real world. We'll be reaching CTOs, CIOs, Heads of Innovation, R&D, data and digitalisation and BIM focused engineers, investors, developers, consultants, contractors, and digital technology buyers from the world's leading contractors.

ACCORDING TO RECENT RESEARCH FROM KHL...

47%

of our newsletter audience are **looking to invest** in new tech this year.

Show buyers why they should choose your tech.

EDUCATE

Initial cost and being **unsure of return on investment** are the most common things holding buyers back from investing.

Educate a captive audience and promote as a thought leader.

65%

of our newsletter audience said technology is **high** or **very high** on their company's agenda currently.

Meet buyers who are ready to learn more and invest.

The rise of sustainable high-rise buildings

Neil Gerrard

Tall buildings pose a unique challenge to sustainability because they offer both positive and negative environmental impacts. In the plus column, they can reduce urban sprawl and promote alternative transportation. But on the downside, the carbon emissions involved in producing the materials to construct these buildings can be high. Tall buildings have typically been constructed using steel or concrete, but what if there was an alternative that could boost the positive impact of the high-rise? That's the question Caitlin Jones explores in today's Construction Briefing, looking specifically at the sustainability benefits of building high-rise buildings with timber.

Read more about the rise of high-rise sustainable buildings.

From Our Partners

Cummins Fuel-Agnostic Engine Delivers Low-To-Zero Carbon Fuel Capability

Throughout its 103-year history, Cummins has driven advancements in power solution technology. The results of multiple developments can be seen in the wide-ranging portfolio of Cummins products, from advanced diesel engines to hydrogen fuel cells, available for a massive variety of applications.

Cummins' latest fuel-agnostic 15-liter engine platform with hydrogen, natural gas and advanced diesel engines offers low-to-zero carbon fuel capability. It's designed to do one thing - accelerate the decarbonization of heavy-duty applications.

Into the woods: The rise of sustainable high-rise buildings

Caitlin Jones
Deputy Editor, International Construction & Construction Europe

30 January 2024
9:13 AM GMT

Tall buildings pose a unique challenge to sustainability because they offer both positive and negative environmental impacts. Positive impacts include reducing urban sprawl, promoting alternative transportation, and allowing efficient energy use on a district scale. But these benefits come at the cost of emitting more carbon dioxide to produce the required materials and to construct the building.

A tall building's embodied carbon footprint is significantly higher than low-rise buildings on a per-square-foot basis. This is because the structure is usually responsible for the majority of a building's embodied carbon footprint, and tall buildings require more structure to support their height.

Tall buildings have typically been constructed using steel or concrete, but what if there was an alternative that could boost the positive impact of the high-rise?

Architecture and engineering firm Skidmore, Owings & Merrill and researchers from Oregon State University recently launched a research project investigating the performance characteristics of a hybrid wood and concrete structural floor system that may offer the industry a traditional far more construction alternative.
